

UK Steel Door SEO Network

Put a specialist search network alongside your fulfilment capability.

Who it fits

Door manufacturers, national installers and specialist demand-generation businesses with an established quotation and delivery operation.

The commercial opportunity

Connect relevant steel, fire and security-door enquiries with a team equipped to specify, quote, supply or install.

A proposed acquisition or exclusive licence of the defined 83-site network. A paid diligence option can be discussed where appropriate.

Explore the workflow

- The public network overview, operating context and asset-scope summary.
- Seller-provided historic context: 100–130 monthly enquiries and peak-year turnover up to approximately £800,000, subject to reconciliation and diligence.

Define what transfers

- The reconciled domain/site schedule and specified seller-owned content.
- Operating materials and an agreed transition of enquiry routing.

Agree the handover

30 calendar days after the final transfer receipt, capped at 20 hours, including the routing runbook and two transfer sessions.

Historic information does not establish current traffic or future results. The separate £350,000 manufacturer project/referral and approximately £1.1m combined context are not all seller revenue. Request dated supporting records during diligence.

Discuss the network and evidence

Tell Mitch about your regional reach and fulfilment capacity to focus the asset and evidence review.
